Take a look at these, let me know if you would like anything else.
Paula Schmittiel and ARSG have asked for these shapfiles also. I will wait to see if you have any modifications or suggestions before I send them on to other people.

Hi Kirstin,

Thanks for the update. Please take whatever time you need to complete your quality control.

John,

I have all three shapefiles with locations done (Upper Animas, Cement, and Mineral), I am adding the new site designation names so that you can search in the ARSG water quality database. I also want Jim Herron to double check some of the sites in Mineral Creek before handing off. I will need another day or two. I will shoot for Tuesday next week.

Sorry for the delay, I just want it to be as close to perfect as possible.

Have a good weekend.

Kirstin

Kirstin,

Now you and John are linked. Also, his phone is: 303-312-6118.

An additional note to both of you: the USGS report (two volume – 1651? I think) has a CD with the mine locations – hopefully in a useable format. So that can be included as a layer information.

Thanks for the help on this.

Steve
